### Harpenden Town Council Opens New Smart Doors With Amthal

**Amthal has installed a state-of-the-art front door entry system at Harpenden Town Council offices that interfaces with a new phone system, to create a more efficient access process and smart security solution for the benefit of staff and visitors.**

Harpenden Town Council, which represents the largest parish in the St Albans District, aims to work closely with the community to promote the area as a place to live, a place to work, a place to invest and a place to visit.

Operating from Harpenden Town Hall, the Council originally sourced Amthal to install a sophisticated internal access control system to ensure the security of all who work and visit the office building.

With the installation of a new cloud based telephone system, the Council once again called on the services of Amthal to recommend a compatible front door intercom system to ensure the efficient running of the office and welcome facilities for visitors
