

Client: Marlborough Science Academy

Outcome: AMTHAL FIRE & SECURITY IS A TOP ACHIEVER AT THE MARLBOROUGH SCIENCE ACADEMY

Amthal Fire & Security has upgraded the fire and security measures at The Marlborough Science Academy to feature high performance IP CCTV, access control and automatic fire detection systems to provide ultimate peace of mind for staff, pupils and visitors.

The Marlborough Science Academy, situated in St Albans, is a specialist science secondary school and sixth form, educating approximately 1,200 students and employing over 80 staff. The school is increasingly being used by the local community out of school hours and so the site required a general upgrade to its security and fire detection systems.

Amthal Fire & Security worked closely with the Estates Management team to provide a comprehensive security overview and offered a number of innovative ideas to ensure complete perimeter security and a smooth operating system throughout the Academy.

The electronic security solution specified, incorporated state of the art IP CCTV together with access control and automatic fire detection systems, all integrated into existing platforms. The structure was installed in just three weeks to ensure minimal disruption to learning timetables.

JAMIE ALLAM, COMMERCIAL DIRECTOR OF AMTHAL FIRE & SECURITY ADDS:

"THE GOVERNMENT'S CONTINUED PLEDGE TOWARDS THE EXTENDED SCHOOLS AGENDA MEANS EDUCATIONAL PREMISES OPERATE TODAY ON A MUCH MORE 'OPEN' NATURE WITH EITHER FULL PUBLIC ACCESS OR PERMITTED GROUP ACCESS INCREASINGLY REQUIRED.

"THIS PLACES ADDED PRESSURES ON FIRE AND SECURITY MEASURES TO ENSURE EVEN OUT OF TRADITIONAL SCHOOL HOURS, THE SITE IS CAREFULLY MONITORED. HERE, THE MARLBOROUGH SCIENCE ACADEMY HAS SHOWN HOW WORKING WITH A TRUSTED BRAND AS AMTHAL FIRE & SECURITY RIGHT FROM SECURITY SPECIFICATION THROUGHOUT THE PROCESS, CAN ENSURE A BESPOKE SECURITY SYSTEM IS CREATED TO OPERATE WITH EXISTING SITE TECHNOLOGIES TO KEEP DISRUPTION, COST AND INSTALL TIMES TO A MINIMUM."

"The school is committed to offering staff, students and the wider local community a vibrant, happy and nurturing learning environment. So that we can do this as safely as possible, we ensure the fire and security systems, right from the entrance to the school and throughout the site, are all maintained to a high level. Amthal Fire & Security has consistently been highly professional and knowledgeable, going above and beyond the call of duty to provide a complete solution that was even installed at a much faster rate than we had scheduled.

We would not hesitate to recommend Amthal Fire & Security to any educational facility looking for guidance and expertise on all aspects of site security."

Chris Paice, Estates Manager at The Marlborough Science Academy
