

**Client:** Verulam School  
**Outcome:** Amthal solves security problems at Verulam School with the A Team.

**Verulam School** was experiencing a number of problems with security and called in **Amthal** to undertake a thorough review of all the security on the large site.

Director **Paul Rosenthal** immediately identified a number of serious deficiencies in the system and advised the school how to terminate the existing contract without financial penalty.

Then, within minutes of the termination, the **Amthal A Team** checked over the system in minute detail, fixed any problems and ensured total security for the staff and pupils whilst on site. Paul then allocated a dedicated experienced engineer to the school to respond immediately to any outstanding faults.

As a result of our work, the number of fault calls has been dramatically reduced.

The school is now totally secure, giving peace of mind to staff, management, pupils and parents. This allows the staff to teach in a relaxed atmosphere, unconcerned about external issues such as intruders or alarm failures.

**Amthal has saved Verulam School time through reducing fault calls and saved valuable budget with a highly cost-effective service.**

VERULAM SCHOOL IS A HIGH-ACHIEVING ACADEMY FOR BOYS IN ST ALBANS WITH AN IMPRESSIVE RECORD OF ACADEMIC AND SPORTING ACHIEVEMENT.

IT IS ALSO RENOWNED FOR ITS COMMITMENT TO THE COMMUNITY ALONG WITH ITS MANY EXTRA-CURRICULAR ACTIVITIES.

**VERULAM HAS RECENTLY RENEWED THE ANNUAL CONTRACT WITH AMTHAL DUE TO THE SUPERB SERVICE PROVIDED BY THE COMPANY. AS A RESULT, WE ARE NOW WORKING ON A NEW ENTRY SYSTEM FOR THE SCHOOL.**

Five years ago when I took over the school we had a number of security issues. Now, thanks to Amthal we have a system that works well with few problems. In a competitive market, I was very lucky to find a company that truly put my thoughts first, listened to what I wanted and delivered exactly what they said they would."

**Phil Hammond, Site Manager**
